

IVAN ZHIGALEV

Frontend Developer / Backend Developer

<https://github.com/Birlogich> vangogimomo@gmail.com 484-761-7991 <https://ivan-zhigalev.vercel.app/> <https://www.linkedin.com/in/birlogich>

Summary

Frontend/Backend (mostly frontend) developer with experience working with HTML, CSS/SCSS, ES6+, Java, React, React-Redux, RESTful API and strong design skills. I worked on commercial projects such as a cloud storage web application. Have a strong combination of technical ability and creativity, eager to tackle complex problems and continue to find ways to maximize user efficiency.

Experience

LENAPE PIZZA

Self-Employed

Pocopson, PA
05/2023 - current

REECARD LLC

Frontend Developer

Irvine, CA (Remote)
08/2023 - 12/2023

Software Startup that specializes in cloud computing

- Built single-page cloud storage application **mistfile.com** using HTML, JS, Tailwind CSS, ReactJS, Redux-React, AWS, RESTful API
- Created the mobile design for an application from scratch
- Integrated STRIPE.API for online payments
- Implemented non-password verification and authorization
- Created functions of uploading and downloading documents with AWS

Career Break

Relocation to the USA. I couldn't work while I was waiting Work Authorization.

Russia - US
09/2022 - 08/2023

SEOTLT

Frontend Developer

Russia
09/2020 - 09/2022

- Developed websites using HTML, CSS, JS
- Used SEO technics for best practices
- Fixing bugs and testing for usability
- Created product cards using information from PM and JSON data

Police of Russia

Detective

Skills

Tech Skills: HTML5, CSS3/SCSS, JavaScript (ES6+), Java, TypeScript, ReactJS 18, GIT, GitHub, Redux, JEST, Webpack, Tailwind CSS, REST API, AJAX and WebSockets, Material UI, Postman, Axios, Figma, Pixso, Vite, Adobe Photoshop, Adobe Audition, Adobe Premiere Pro, Agile/Scrum methodology

My projects

Mistfile

This is a cloud computing application. We used non-password verification, I extracted data from search query information and checked user type and subscription type, using Redux RTK and React-Router-Dom and useEffect Hook. Uploaded files to Reecard API and AWS to securely encrypt data and uploaded decrypted data subsequently, and also integrated Stripe API. Wrapped by Redux RTK to avoid props drilling and save necessary data in the store and in local storage via Redux-Persist

Tech Stack: HTML, Tailwind CSS, Animated Tailwind CSS, ReactJS, STRIPEJS, JS cookie, React-Hook-Form, React-Router-Dom, Redux Persist, Redux RTK

URL Shortener

This project is a URL shortener web application. The app allows users to shorten long URLs into more manageable, easy-to-share links.

Tech Stack: HTML5, CSS3, SCSS, Framer-Motion Library For CSS, JavaScript (ES6+), ReactJS, React-Copy-To-Clipboard, React-Redux, React-Router-Dom, Redux-Persist, React-Icons, React-Hook-Form.
